[Concrete Washout Systems Inc.](#), Elk Grove, Calif., has signed a licensing agreement with CWS Hawaii, which will begin distributing and servicing the Concrete Washout Systems (CWS) containers in Hawaii.

CWS Hawaii, a start-up company formed to distribute and service the Concrete Washout Systems containers, will begin servicing the entire state. Gregory Perrin, a veteran in the concrete pumping industry and owner of American Standard Concrete Pumping Hawaii Inc., will be guiding the new company.

“Concrete washout is a huge problem for our island construction community. CWS is the first system that fully addresses all the problems associated with concrete washout,” Perrin says.

Licensed partners will own and operate a Concrete Washout Systems business in their designated region where they will be responsible for all aspects of the business.

Currently, Concrete Washout Systems has licensed partners throughout most of California, Las Vegas and Reno, Nev., Phoenix, Denver and Southeast Florida.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout materials and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates off-site recycling of the same material while helping protect the storm drain system.
