

Concrete Washout Systems, Inc. Signs Exclusive Manufacturing Agreement With The Nations Leader in Plastic Liner Manufacturing

Horn Plastics, Inc. Will Exclusively Manufacture Its Proprietary Super-Slide® Blue-Stripe™ for Concrete Washout Systems™ Containers

Elk Grove, CA.-March 14, 2005 - Concrete Washout Systems, Inc., (CWS) announced today that Horn Plastics, Inc., the industries leader in plastic lining applications, has signed an exclusive agreement and will manufacture and supply its Super-Slide® Blue-Stripe™ plastic liner for the patent pending Concrete Washout Systems™ containers.

“Horn Plastics is excited to be partnered with Concrete Washout Systems since this is the first time that Super-Slide has been put to use in a sealed container for liquid concrete waste. This application has been very successful and we look forward to the upside potential that Concrete Washout Systems brings in this new niche market,” stated Phil Horn, President of Horn Plastics, Inc.

“We are very pleased to have Horn Plastics as an exclusive manufacturing partner. Their manufacturing capabilities coupled with their service and outstanding product line has been an asset to our business,” stated Mark Jenkins, President of Concrete Washout Systems, Inc. “Horn Plastics is at the forefront of their industry, as we are, and our relationship will strengthen as we forge ahead with our businesses,” added Mr. Jenkins.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application. This system replaces other outdated washout BMP's, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

About Horn Plastics

Horn Plastics was founded 22 years ago in 1983 by Phil Horn. The company is based in Fargo, ND with a manufacturing plant in Wisconsin Dells, Wisconsin. Our mission statement is “Providing solutions with engineered plastics”. The sole reason for our existence is to solve customer problems with our Superslide brand of materials. Superslide liners are slippery and tough plastics used to eliminate sticking and abrasive wear. The benefits are lower maintenance costs, higher productivity and increased safety.
