

Concrete Washout Systems Strikes Partnership with Stormwater Workshops™

Stormwater Workshops, LLC Selects Concrete Washout Systems as a Risk Management and Compliance BMP Partner for the Upcoming 26 City National Stormwater Summit Tour

Elk Grove, CA, October 26, 2005 - Concrete Washout Systems, Inc., (CWS), provider of Essential Risk Management Solutions™, announced today that Stormwater Workshops™, LLC has selected Concrete Washout Systems to partner with in their National Stormwater Summit workshops and provide critical risk management and compliance training related to concrete washout.

Stormwater Workshops™, LLC, is comprised of leading industry experts who have combined their experience to produce a National Stormwater Summit. This 26-city tour will incorporate the latest innovations in Best Management Practices (BMPs) and Best Available Technologies (BATs) for quality stormwater compliance. The National Stormwater Summit will combine an NPDES stormwater training program; an expert's roundtable; a site tour and demonstration, including products manufactured by Profile Products LLC; the EPA perspective session; award-winning motivational speaker, Jeff Conley; and a comprehensive reference manual. For more, visit www.stormwatersummit.com.

National Stormwater Summit workshops will be sponsored in part by Concrete Washout Systems, Profile Products, SI Geosolutions, Paradigm Engineering, Great American Total Erosion Control and Pollution Solution along with resource partners; International Erosion Control Association (IECA), Environmental Protection Agency (EPA), National Association of Home Builders (NAHB), and Land Development Today.

“We have created strategic alliances across the industry to create the most comprehensive training summit for builders, developers, engineers and government officials,” said John Hall, founder of Stormwater Workshops™. “Concrete Washout Systems is a best-of-breed company that enhances the value proposition for each of our summit attendees; offering the building industry essential risk management solutions for concrete washout containment,” added Mr. Hall.

“Stormwater Workshops™ will provide the building and stormwater industries with an unprecedented coalition of leaders; from service and product providers to regulatory and resource partners, equipping them with essential risk management solutions,” stated Mark Jenkins, President of Concrete Washout Systems, Inc. “Concrete Washout Systems is very excited to be part of this incredible opportunity and we look forward to providing our expertise to those within the building industry in order to improve their overall awareness and risk management,” added Mr. Jenkins.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges.

About Concrete Washout Systems, Inc.

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
