

Concrete Washout Systems, Inc. Expands Its Presence Into Reno, Nevada

Strategic Partner, American Concrete Washouts, Inc., Will Begin Servicing Builders and Contractors in The Greater Reno and South Lake Tahoe Areas

Elk Grove, CA.-March 11, 2005 - Concrete Washout Systems, Inc., announced today that it's licensed partner, American Concrete Washouts, Inc. (ACW), will begin distributing and servicing the Concrete Washout Systems (CWS) in the Reno, Nevada and South Lake Tahoe markets.

"The demand we have been seeing up to this point has been phenomenal. Tougher enforcement by the regulatory community and overall awareness of more sensible practices has been the driving force." stated Mike Liston, President of American Concrete Washouts, Inc. "We continue to provide our current customer base top quality service and look forward to developing new relationships as we continue our expansion," added Mr. Liston.

"ACW continues to push forward at a rapid pace, keeping up with demand and expanding into new untapped markets. As we said before, we fully expect to see them in additional markets as they continue their aggressive expansion," stated Kevin Mickelson, Vice President of Concrete Washout Systems, Inc.

Licensed partners will own and operate a Concrete Washout Systems business in their designated region where they will be responsible for all aspects of the business. Currently Concrete Washout Systems has licensed partners throughout most of California, Las Vegas and now Reno, Nevada, Phoenix, Arizona, Denver, Colorado and Southeast Florida.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application. This risk management system replaces other outdated washout BMP's, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

About Concrete Washout Systems, Inc.

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
