

Concrete Washout Systems, Inc. Sails Into the State of Hawaii

Concrete Washout Systems of Hawaii Will Begin Servicing Builders and Contractors within the State of Hawaii

Elk Grove, CA.-April 26, 2005 - Concrete Washout Systems, Inc., announced today that it has signed a licensing agreement with its newest partner, CWS Hawaii, who will begin distributing and servicing the Concrete Washout Systems™ (CWS) in Hawaii.

CWS Hawaii, a start-up company formed to distribute and service the Concrete Washout Systems™ containers, will begin servicing the entire state of Hawaii. Gregory Perrin, a veteran in the concrete pumping industry and owner of American Standard Concrete Pumping Hawaii, Inc., will be guiding the new company.

“Concrete washout is a huge problem for our Island construction community. CWS is the first system that fully addresses all the problems associated with concrete washout,” stated Gregory Perrin, President of Concrete Washout Systems of Hawaii, Inc. “This system will help protect our Island’s limited natural resources, landfills, marine life, water supply, and the beauty of our Island paradise,” Mr. Perrin noted.

“Mr. Perrin’s accomplishments and experience as a veteran in the concrete pumping industry have an immeasurable value to us and we are very excited to have him come aboard,” stated Kevin Mickelson, Vice President of Concrete Washout Systems, Inc. “As a pump owner and operator, Mr. Perrin understands the compliance issues related to not only the pumping operations but the concrete industry in general and realizes the value and benefit of our business model. CWS Hawaii will be providing a much needed and innovative risk management tool and service to a strong construction market,” added Mr. Mickelson.

Licensed partners will own and operate a Concrete Washout Systems business in their designated region where they will be responsible for all aspects of the business. Currently Concrete Washout Systems has licensed partners throughout most of California, Las Vegas and Reno, Nevada, Phoenix, Arizona, Denver, Colorado and Southeast Florida.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application. This risk management system replaces other outdated washout BMP’s, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

About Concrete Washout Systems, Inc.

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
