

Concrete Washout Systems, Inc. Expansion Moves Into Riverside and San Bernardino Counties

National Concrete Washout is Servicing Builders and Contractors in Fast Growing California Counties; Riverside and San Bernardino

Elk Grove, CA. - August 31, 2005 - Concrete Washout Systems, Inc., announced today that National Concrete Washout, has recently began distributing and servicing Concrete Washout Systems (CWS) in Riverside and San Bernardino Counties of California.

Atlantic Concrete Washout, Inc., a start-up company specifically formed to distribute and service the CWS, began servicing Southeast Florida in the beginning of 2005 and has now expanded their operations into two fast growing California counties and doing business under the name, National Concrete Washout.

“Concrete Washout Systems has provided us with an excellent opportunity to expand our business. With this expansion we have become a truly national company,” stated Ted Honcharik, CEO of Atlantic Concrete Washout. “We are thrilled with the support we have received from CWS and excited about the potential for growth in the Southern California Market,” added Mr. Honcharik.

“Mr. Honcharik has done a phenomenal job in penetrating the stubborn Southeast Florida market for Concrete Washout Systems” stated Kevin Mickelson, Vice President of Concrete Washout Systems, Inc. “We believe with his assistance in Southern California, Concrete Washout Systems will continue to expand; providing critical and timely services to an exploding construction market,” added Mr. Mickelson.

CWS is currently seeking licensed partners in numerous markets across the nation. Licensed partners will own and operate a Concrete Washout Systems business in their designated region where they will be responsible for all aspects of the business. Currently Concrete Washout Systems has licensed partners throughout most of California, Hawaii, Las Vegas and Reno, Nevada, Phoenix and Tucson, Arizona, Denver, Colorado and Southeast Florida and have recently signed license agreements for portions of Minnesota and Texas.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application as concrete material is diverted away from landfills and recycled. This system replaces other outdated washout BMP's, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

About Concrete Washout Systems, Inc.

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
