

## **Concrete Washout Systems, Inc's Southern California Expansion Continues**

*California Concrete Washout Systems, LLC Has Begun Servicing Builders and Contractors in the Greater San Diego Market*

Elk Grove, CA. – August 17, 2005 - Concrete Washout Systems, Inc., announced today that California Concrete Washout Systems, LLC has recently begun distributing and servicing Concrete Washout Systems (CWS) in San Diego and Southern Riverside Counties of California.

California Concrete Washout Systems is a newly formed company operating under the guidance of Mark Jenkins and Dave Vaccarezza. Mark Jenkins is president of both Concrete Washout Systems, Inc. and Elk Grove Waste Management, a CWS licensee in the Sacramento Valley market and Dave Vaccarezza is president of California Waste Recovery, also a CWS licensee in Central California.

“We are very pleased to have the opportunity to represent CWS in the greater San Diego market,” stated Dave Vaccarezza, Managing Partner of California Concrete Washout Systems, LLC. “The San Diego market is exploding with growth and we see ourselves positioned to offer our risk management services to builders and contractors alike with a strong team and an innovative product,” added Mr. Vaccarezza.

“We are very excited to have CCWS as a partner with the experience and expertise their team has to offer,” stated Kevin Mickelson, Vice President of Concrete Washout Systems, Inc. “The San Diego market is developing at a rapid pace and is in need of risk management solutions that CCWS will be offering,” added Mr. Mickelson.

CWS is currently seeking licensed partners in numerous markets across the nation. Licensed partners will own and operate a Concrete Washout Systems business in their designated region where they will be responsible for all aspects of the business. Currently Concrete Washout Systems has licensed partners throughout most of California, Hawaii, Las Vegas and Reno, Nevada, Phoenix and Tucson, Arizona, Denver, Colorado and Southeast Florida and have recently signed license agreements for portions of Minnesota and Texas.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application as concrete material is diverted away from landfills and recycled. This system replaces other outdated washout BMP's, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

### **About Concrete Washout Systems, Inc.**

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
