

## **Concrete Washout Systems, Inc. Sweeps 2005 World of Concrete Awards**

*Experts' and Attendees' Agree, Concrete Washout Systems is the Most Innovative Product at Trade Show*

Elk Grove, CA.-April 22, 2004 - Concrete Washout Systems, Inc., (CWS) announced today that it has received the coveted Most Innovative Product Award from the 2005 World of Concrete for its patent pending Concrete Washout Systems container.

Products were recognized by a panel, comprised of concrete and masonry industry experts, and World of Concrete attendees for having the greatest impact on the concrete or masonry industry. Concrete Washout Systems was awarded both the experts and attendees choice awards for the most innovative product in the production category.

“We are very pleased to have received both the experts’ and attendees’ choice awards this year at World of Concrete 2005. There were so many great products showcased at World of Concrete and we are appreciative of the recognition by both the groups,” stated Mark Jenkins, President of Concrete Washout Systems, Inc. “Attending World of Concrete this year allowed us not only the opportunity to demonstrate our system at the show but also the opportunity to provide awareness and a solution to the compliance issues the concrete and masonry industries face today,” added Mr. Jenkins.

The patent pending CWS is a portable, self-contained and watertight bin that controls, captures and contains concrete washout material and wastewater. It allows trade personnel to easily washout concrete trucks, pumps and equipment on site and facilitates easy off site recycling of the same concrete materials and wastewater, while protecting the storm drain system from potential illegal discharges. The off site recycling component creates an even more environmentally sound application. This system replaces other outdated washout BMP’s, which are costly, unsightly and damaging to the environment since their containment value diminishes, due to inherently faulty material, over use and lack of maintenance.

### **About Concrete Washout Systems, Inc.**

Concrete Washout Systems is a risk management specialist and industry pioneer in concrete washout and wastewater removal, treatment and recycling. The patent-pending Concrete Washout Systems provides a cost effective, environmentally friendly and compliance alternative for homebuilders, contractors, ready mix and pump operators and environmental engineering firms.
